VOLUME DISCOUNT
Customers will receive $50 off per bull on multiple bulls.

TERMS
Cattle sell under the suggested Terms and Conditions of the American Angus Association and American Hereford Association. Terms of the sale are cash unless satisfactory credit arrangements have been made prior. Sale day announcements take precedence over printed material. The auctioneer will settle all disputes.

DELIVERY/PICKUP
Arrangements for pick-up must be made at settlement. Consignors will care for bulls for two weeks at no charge. After April 1, 2017, the cost will be $3/head/day. Purchaser assumes the risk of death or injury immediately after the animal is sold. Insurance is recommended and can be arranged by Jensen Livestock Agency.

VIDEOS AND ONLINE BIDS
Bulls will not be going through a sale ring, they will be displayed at the sale site. The sale will be broadcast on DVAuction. Please register at *DVAuction.com*. Prior to the sale, videos will be available at *OnTargetBullSale.com*.

LIABILITY
All persons attending the sale do so at their own risk, and the owners and their agents assume no liability, legal or otherwise, for any accidents which may occur.

BREEDING GUARANTEES
Bulls and females are guaranteed to be breeders for the first 90-day breeding season with the exception of: 1) Injury or disease occurring to the animal after the time of purchase. 2) Gross negligence or willful misconduct on the part of the purchaser. If problems arise buyer must contact seller before any action, such as disposal of animal, is taken.

GENOMIC TESTING
All Angus and the yearling Hereford bulls have been DNA tested. These animals all have genomic-enhanced EPDs, which provides a substantial improvement in EPD accuracy for conventional growth and carcass traits.

Dear Fellow Cattlemen and Friends,

Welcome to Blue Rapids in the beautiful Flint Hills. We think starting our calves on the grasses of the Flint Hills puts them on a path of good nutrition that will carry on into your herd.

We have been selling bulls in a sale for 19 years and have enjoyed every year and continue to strive for improvement. We are excited to once again partner with Springhill Herefords for our 3rd On Target Bull Sale.

Our cow herd is selected for fleshing ability, problem-free udders and fertility. We strive to produce bulls with moderate birth weights, accelerated growth traits and acceptable carcass traits. The bulls are the result of mating decisions made by evaluating EPD and performance data, while giving attention to traits that aren't measured by numbers – good udders, sound feet, good dispositions, eye appeal and soundness. Alcove Cattle Co. uses an aggressive AI program to capture new and popular bulls, which in turn gives you more choice. With our embryo program we are able to utilize our best donors with genetically proven sires. In addition we have purchased high quality embryos from other breeders to diversify our herd and give you more choice in buying bulls.

Building our own bull facility has given us the opportunity to have them close to home so we can observe them daily and make adjustments as needed. The large grass runs allow them to spread out and get more exercise.

Choosing a herd sire is an important decision. It affects your herd and your income for years to come. We stress good disposition in our cattle. Docile cattle result in more profit as compared to nervous and aggressive cattle. Repeat customers have always commented on the docility of our cattle. This is a direct result of the time that is spent with the cattle. From calf on, these cattle have been walked through almost daily. This allows them to be accustomed to being touched by their handler. We are confident that our bulls will have a beneficial impact on strengthening the maternal traits of replacement females, improving commercial feedlot performance, and enhancing the eating characteristics preferred by beef consumers.

We are offering some excellent open yearling Angus heifers. Be sure to take a look at these females. They would be great additions to your herd.

Both the bulls and the heifers have been ultrasounded, pelvic scored, vaccinated and tested for BVD. They are guaranteed PI negative. Additionally all Angus bulls and heifers have had a genomic test performed on a DNA sample to provide additional information used in the calculation of their EPDs. Genomic results are a way to enhance predictability of current selection tools, to achieve more accuracy on EPDs for younger animals and to characterize genetics for traits where it's difficult to measure the animal's own performance for the trait, such as carcass traits in breeding stock or maternal traits in bulls. Our hope is this will give you more confidence in the animal.

We strive to provide you with Angus cattle that are easy to handle and add value to your herd. If you have any questions about the offerings in this catalog, please give us a call. We encourage you to view the bulls before sale day at our bull facility north of Blue Rapids or come early on sale day. The heifers are at the ranch, give us a call if you want to see them before sale day.

We look forward to seeing you on March 18th.

Sincerely,
Ken & Zita Duensing,
Alcove Cattle Co.

Powerhouse full of muscle. He will add pounds and growth to your calves. Heifer bull.

LOT 27: ALCOVE PIONEER 648

Turn to Page 18 to see information on these quality heifers to add to your herd. These heifers have had ultrasound data collected, been pelvic scored and BVD tested. They have been given the following shots: Ultrabac 7, PregGuard Gold FP10 and Multimin. Additionally they have been poured with Eprinex. They are ready for pasture.

Dear Friends,

SPRINGHILL HEREFORDS
David & Delores Stump
Dan & Kim Schmidt
SpringhillHerefords.com

Welcome to our third On Target Bull Sale. It is a pleasure to host the sale with our good friends and associates Ken and Zita Duensing.

Our family has been raising Herefords since 1937. The current buzzword in agriculture is "sustainable beef." Although the experts haven't determined how to define it yet, I think 80 years in production agriculture does. Our headquarters today was rented in 1936 with the understanding that you take care of the native grass by taking half, leaving half and keeping the trees and weeds out. He also steered my dad to Herefords. Both suggestions were good advice and are what have kept us going and paid the bills.

Our goal is to raise cattle that are not "one dimensional," we want middle-of-the-road cows that are structurally sound, graze our native pastures and utilize crop residue at least 10 months of the year, have a calf every year unassisted and wean at a respectable weight.

We have an extensive AI program that includes heifers bred to low birth-weight bulls then cleaned up for 60 days. Plus 90% of our cow herd is AI bred to moderate birth weight and growth bulls with acceptable carcass numbers. We utilize proven bulls but we're not afraid to sample a well-made young bull.

This year's bull offering represents our program quite well. It includes bulls designed for calving ease you can use comfortably on your replacment heifers and bulls with the growth and carcass numbers to use on cows. You will find our bulls are "people friendly." This is our second year of selling embryo brothers. Our feeling on embryo transfer is very simple — the cow has to be proven by her offspring, structure and udder quality with above average EPDs. To be a donor in our program she has to be a cow that will keep you in the "sustainable beef" business. X049 is that kind of cow and as Lots 43-46 prove Trust worked good on her.

Our operation would not be sustainable if it wasn't for family. My sisters, Sue and Sally, and late brother, Jim, have been supportive and encouraging. Daughters Angie, Jami and Kim have brought enthusiasm to our operation and the work ethic and drive to build our program. Together with their husbands and our seven grandkids they play an important role in the success of Springhill Herefords.

We look forward to hosting you on March 18. If you have any questions before the sale, don't hesitate to contact any of us. We'll have the bulls at the sale site by 10 a.m. Saturday morning. If you'd like to view them before the sale give us a call. Videos of each lot are available online at *OnTargetBullSale.com*. If you can't attend in person, the sale will be broadcast online on *DVAuction.com*.

Yours to sustainable beef,

Dave Stump

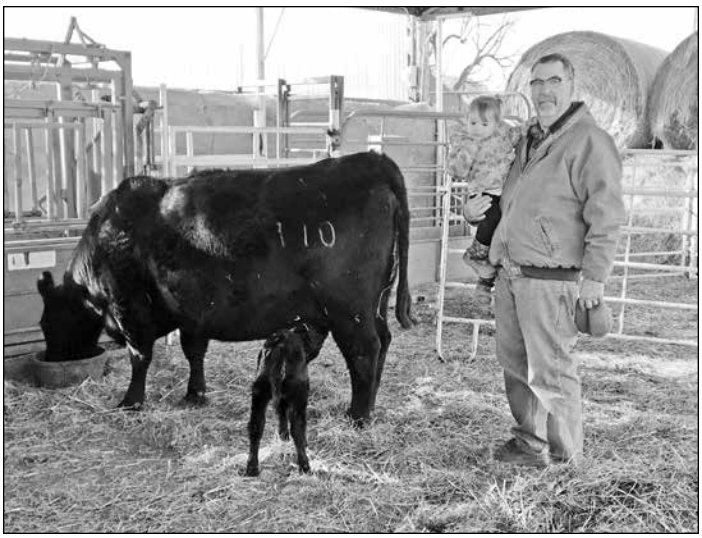
Docility along with a stylish package make this heifer very desirable.



Ken and granddaughter Ava checking out this year's calf crop.

ON TARGET BULL DEVELOPMENT CENTER

The Hereford and Angus sale bulls are developed at the same location north of Blue Rapids. The facility includes two 3-acre tracks where the bulls can become athletes. Our goal is to prepare the bulls so they are ready to go to work for you.

The bulls arrived at the center on November 8. They were developed on rations that met their protein requirements and maximized their performance. Ration Manager and corn were fed along with long stem hay. The Ration Manager program utilizes the Intake Modifying Technology causing cattle to consume multiple small feedings daily, which optimized the flow of nutrients to the digestive system thereby increasing forage intake, overall utilization and cattle performance. As a group the bulls averaged 3.25 ADG.

The bulls will be at our development center until sale day. If you'd like to view them at the center give us a call.
